

## Project 01 Madrid in details Dashboard

### Insight #1:

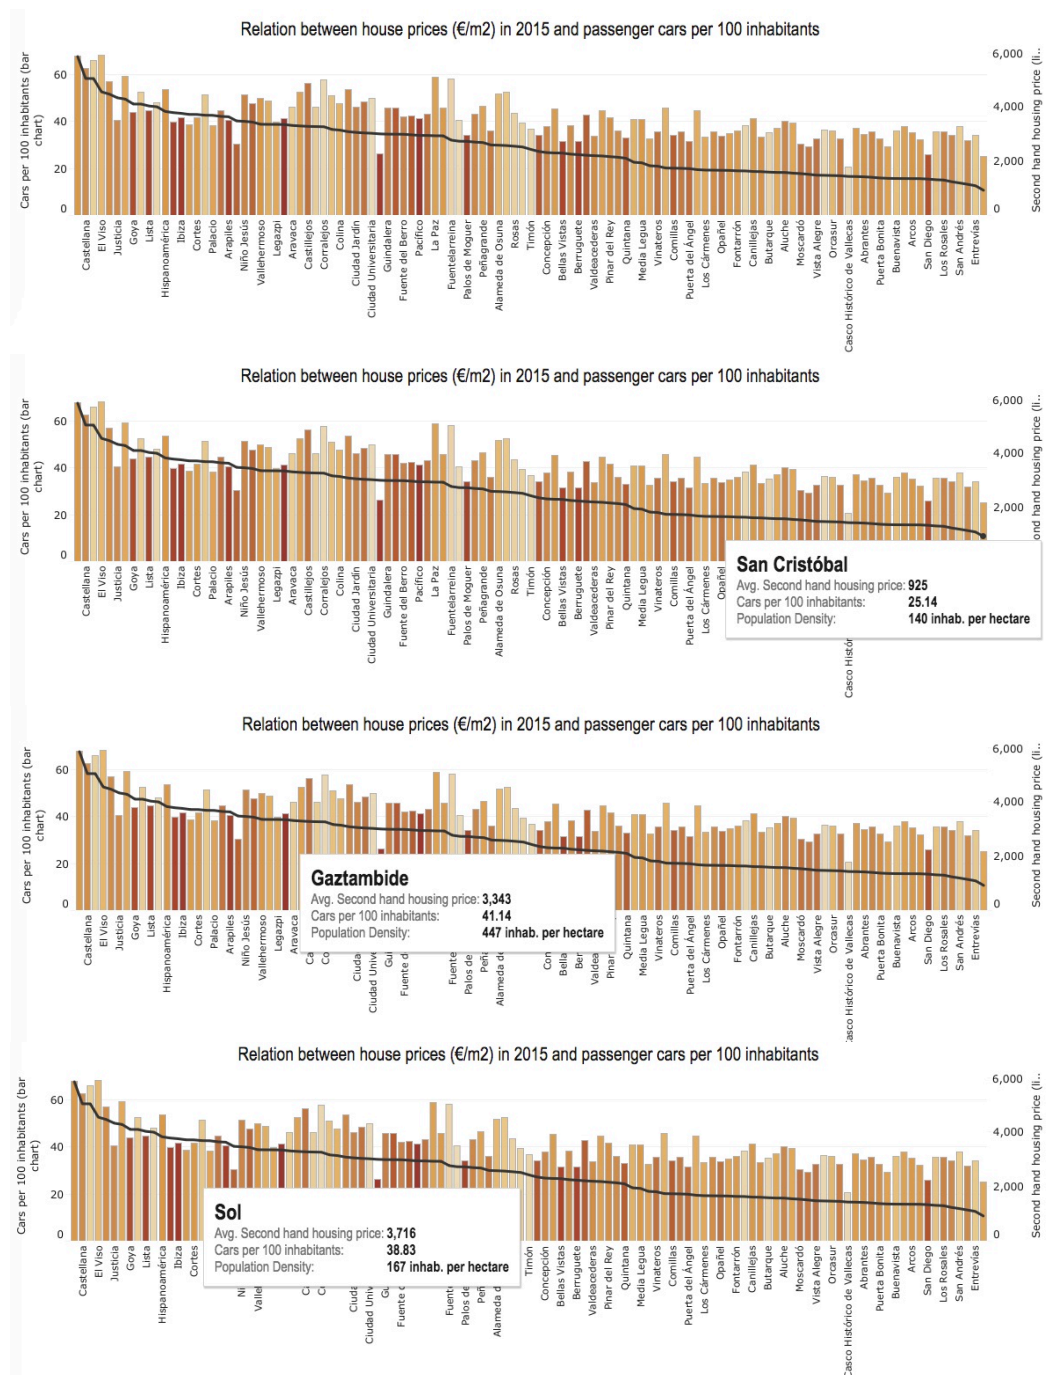

The highest population density of Madrid Neighborhoods in 2015 i.e. the most crowded ones are Gaztambide with density of 447 per hectare, Pacifico with density of 445 per hectare and Ibiza with density of 436 per hectare.

### Insight #2:

In 2015, according to Madrid Neighborhoods, the highest votes were for PP (Right Wing Party) and the three highest population density neighborhoods were the most dominant ones over the rest neighborhoods.

## Insight #3:

According to the relationship between House pricing and passenger cars per 100 inhabitants chart, we can tell that the higher the population density, the lower the number of cars per inhabitants.
